***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 05/31/2007 has been entered.

***Allowable Subject Matter***

2. Claims 1-13 and 19-21 were indicated as allowable in previous Office Actions.
3. Claim 18 is allowable.

The following is the statement of reasons for the indication of allowable subject matter for claim 18: The prior art disclosed by the applicant and cited by the Examiner fail to teach or suggest, alone or in combination, ***all*** the limitations of claim 18, particularly a method for providing a backplane system that has a plurality of PCBs, each PCB having an electrical component, wherein when a printed circuit board is plugged in such that its electrical component has an incompatible speed relative to the other printed circuit boards, an electrical circuit will electrically decouple the electrical component on the additional board without user intervention.

US Pat. Pub. No. 2002/0099875 to Locklear et al., previously applied as prior art, does not disclose the automatic decoupling of electrical components that have speed incompatibilities. Locklear et al. requires physical removal of the electrical components (*e.g., a PCB*) by the user.

US Pat. No. 5,031,073 to Chang discloses a PCB (*Fig. 2*) wherein electrical components on the PCB itself can be electrically decoupled from the other electrical components if there is an incompatibility in their specifications (*Column 2, lines 34-57*). However, Chang does not disclose multiple PCBs having the ability to decouple electrical components in relation to all the PCBs nor does Chang indicate whether the decoupling is done without user intervention.

***Conclusion***
